BEHAVIOR SUMMARY INSIGHTS

- Customer tenure has a strong impact on churn. The longer the tenure, the lower the churn rate.
- Customers using 1-50 international minutes are a critical risk group (64.42% churn rate). These are new accounts with short account length.
- Having an international plan does not significantly alter churn behavior.
- Grouped data contract reduces churn by >20%
- Over 75% of customers use less than 10GB of data monthly.
- Service experience is a major driver of churn. Customers making more than 2 calls churn at an extremely high rate, with 5 calls resulting in 100% churn.
- Churn customers make an average of over 2 calls.

TOTAL REVENUE BY STATE

Revenue is heavily concentrated along the East Coast and major urban corridors, while the Mountain and Central regions remain largely untapped.

CUSTOMERS AND CHURN RATE VS CUSTOMER VALUE

Churn rate drops significantly as customer value increases, shifting from 31% in Low Value down to 16% in High Value segments.

REVENUE LOST BY STATE

The East Coast experience a significantly higher concentration of state revenue loss compared to the central and western parts of the country.

REVENUE BY CONTRACT TYPE

Two-Year contracts generate the highest total revenue (roughly 42% of the total revenue).

CUSTOMER SEGMENTATION BY CHURN RATE

Customer Value Segment	High Risk	Low Risk	Moderate Risk	Total
High Value	75.00%	5.00%	27.04%	15.08%
Low Value	89.47%	9.66%	60.00%	31.70%
Mid Value	79.55%	5.53%	35.01%	18.71%
Total	81.33%	8.12%	51.28%	26.85%

- High Risk dominates churn
- Low value segments are the most volatile
- High Value retention is strong but threatened
- Mid Value sits in the middle

REVENUE BY CHURN CATEGORY

Competitors are a primary threat, with the top 2 reasons for churn being related to them. Customer service is a major pain point.
